

SWAN VALLEY PRIMARY CARE CENTRE ADVANCED CARE CLINIC

EVERY MONDAY and THURSDAY 4PM - 7PM

The Primary Care Centre is offering an Advanced Care Clinic to offer medical care outside of usual clinic hours for health concerns such as:

- Ear infections
- High fevers
- Respiratory problems
- Bronchitis
- Sore throat
- Strep throat
- Allergic reactions
- Rashes
- Bladder infections
- Colds/Flu
- Strains
- Sprains
- Puncture wounds
- Lacerations
- Insect bites
- Pink eye
- Minor burns

May I use Advanced Care Clinic for routine care?

No. These services are designed for urgent problems where people may have typically sought care through the emergency department after clinic hours. Physical exams, check-ups and other routine care should be scheduled with your primary care physician.

If you present for care that can be addressed through routine physician or nurse practitioner visits, you will be asked to schedule a regular appointment.

If you do not have a primary care physician, please contact the clinic to make arrangements to sign up with one of the health care providers accepting new patients.

Do I have to be a SVPCC patient to access care?

Definitely not. The SVPCC Advanced Care clinic is open to anyone who is requiring urgent care. Please bring the appropriate health information when you present to the administration.

Do I need an appointment?

No scheduled appointments will be made for the Advanced Care Clinic. A physician and a nurse practitioner will be available from 4 pm – 7pm. When you arrive at the clinic you will receive a number. Once the numbers have been given out, there are no further appointments available that evening.
